This was an amazing concept that had been ignored for a long time. It was an affordable convertible that was modern and fun to drive. I was living with an amazing woman and we both had descent jobs. I really wanted her to have a nice car like this, so we leased one.

Top-down summertime PCH California, ...need I say more? Fast and fun plus it got good mileage. It worked well for a long time when we were carpooling to work together. When that no longer worked, I starting riding a motorcycle when necessary. When times got tough, repoman got it.
